

Digital Arts Centre

A showpiece of the University is our new state-of-the-art Digital Arts Centre, which offers facilities for the University, the community and industry.

The Digital Arts Centre offers a range of digital media resources in specialist computer suites. There is also a digital video studio with lighting rig and blue screen technology. In addition, we have a sound recording studio, specified to commercial standards. All the facilities are designed to allow the production of innovative, professional and creative work, using industry-standard software. These include:

- Digital Video Studio with lighting rig, blue screen technology and mixing desks
- Digital video editing
- A Recording Studio with a digital sound and music editing studio
- Computer suites with industry-standard software that covers animation, image creation, video editing, multimedia and graphic and web design

The new Centre houses our community of students and teaching staff who are practising specialists in their field. This community is involved in the learning, teaching, production and research of all aspects of digital media. Building on the success of our undergraduate programme, we have launched an exciting [new MA course](#).
