

STEM Support

Welcome to the STEM Support Office for Hereford & Worcester

Our aim is to inspire and encourage the young people of Hereford & Worcester to consider the varied career opportunities in Science, Technology & Design, Engineering and Mathematics (STEM).

We aim to achieve this by supporting local Primary Schools, High Schools and Colleges to enhance and enrich the STEM subjects:

- by providing comprehensive information for educators about the availability of local and national STEM resources, materials, activities and events
- by supporting schools to link education with the world of work through access to the nationally accredited STEM Ambassador programme
