

# Coaching and Guidance for Advanced Clinical Practice

## MACP4004

One of the pillars of Advanced Clinical Practice is Education, this module allows the student to be able to assess and address the learning needs of themselves, others and at an organisational level. A deeper appreciation of coaching and its use to develop a culture of life-long learning, will enable role modelling to inspire the future and existing professional contacts of the Advanced Clinical Practitioner. This module will explore and examine the learning and coaching theory to give the practitioner a sound evidence base to become an aspirational role model.

### Content:

- Learning theories
- Training needs analysis
- Collaborative/team/individual working
- Coaching and guidance in advanced clinical practice
- Health literacy and motivational interviewing
- Supporting behaviour change
