

# Clinical Reasoning for Enhanced Practice

## MECP4003

This module will provide multi-professional enhanced practitioners, from a variety of specialties, with the opportunity to develop skills in clinical reasoning and decision making. These enhanced skills will underpin their history taking and clinical examination skills and aid safe and accurate differential diagnoses in their specialist area and scope of practice.

(If completing the full PG Cert Enhanced Clinical Practitioner; this is the third module.)

Content includes:

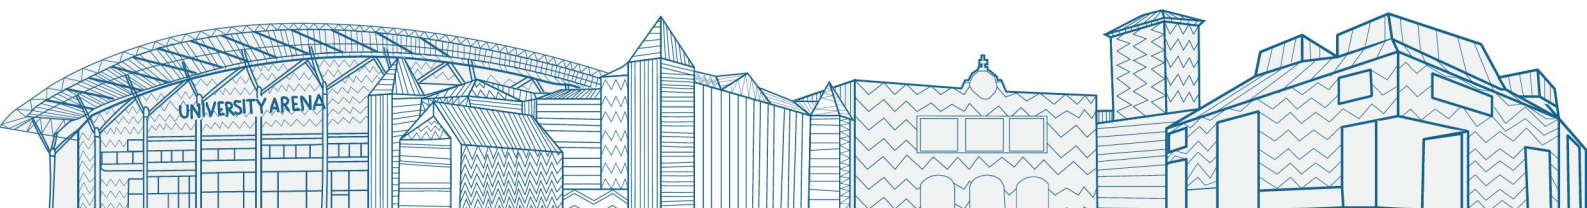

- Major decision-making theories and clinical decision-making tools
- Factors influencing clinical decision making, including human factors
- Scope of practice
- Clinical reasoning in interpreting blood results (U&Es, FBC, LFTs, VBG, principles of x-ray interpretation and CXR interpretation, and 12 lead ECG interpretation
- Legal issues

## Assessment

Case-based presentation and supporting paper
